### 3. Hazards Identification

Emergency Overview
<p>Inhalation - Dust inhalation hazard.</p> <p>Caution- Product contains a natural earth material in which naturally occurring silica in the form of quartz is present. Long-term inhalation of dust containing crystalline silica may cause chronic lung damage (silicosis). Respirable crystalline silica is known to the State of California to cause cancer. IARC (International Agency for Research on Cancer concludes that there is "sufficient evidence in humans for the carcinogenicity of inhaled crystalline silica in the form of quartz".</p> <p>Under conditions of normal use, exposure to respirable crystalline silica in this product is below the OSHA Permissible Exposure Limit and the ACGIH Threshold Limit Value®. To reduce exposure when applying product within confined spaces, use ventilation and NIOSH or MSHA approved respirator.</p>
<p>NOTE: Hazard information is based on the characteristics of the components of this mixture.</p> <p><b>Inhalation</b> - Exposure to dust containing crystalline silica may cause eye and respiratory irritation.</p> <p><b>Skin and Eye Contact</b> - Minor irritation of skin or eyes may occur as a result of contact with the fragrance absorbed in this material.</p>

### 4. First Aid

<p><b>Ingestion</b> - If patient is conscious give two glasses of water. <b>Do not</b> induce vomiting. Seek medical attention immediately.</p> <p><b>Inhalation</b> - Remove person to fresh air. Any dust in the throat or nasal passages should clear naturally. Seek medical attention if irritation persists.</p> <p><b>Eye Contact</b> - Flush eyes with water for 15 minutes. Seek medical attention if irritation develops.</p> <p><b>Skin Contact</b> - Wash skin with mild soap and water. Seek medical attention if irritation develops.</p>

### 7. Handling & Storage

<p>Methods of application for this product are designed to minimize or eliminate contact with the product. Exposure to respirable dust is not expected during the normal handling or application of this product. Should contact with the product be necessary the use of gloves to handle the product is recommended. Minimize physical handling of the product in order to eliminate the generation of dust. If dusty conditions are encountered the use of respiratory protection is recommended.</p>
