

## Product Information Sheet

### New PetZONE with Hydrocide

#### Pet Urine Stain & Odor Neutralizer

PetZONE with Hydrocide combines the cleaning and deodorizing power of natural oxygen with the odor bonding and encapsulating power of Hydrocide to give the professional cleaner an entirely new way to neutralize odors caused by urine contamination, without leaving strong and potentially offensive fragrances behind. In addition, the natural oxygen will effectively eliminate stains caused by the urine contamination. This revolutionary formula also includes special additives to enhance solution penetration and improve rinsing and removal. It also contains anti-re-soiling properties that keep the treated area from attracting residue.

*Available in August of 2008*

- Combines the cleaning and deodorizing power of natural oxygen with the odor bonding and encapsulating power of Hydrocide
- Uses oxygen bleach to help clean and remove stains of typical products
- Hydrocide is combined with great rinse agent to neutralize odor and to help rinsing process.
- No strong or potentially offensive strong fragrances left behind
- Dilution of six ounces per gallon instead of typical eight ounces makes its use more cost effective
- 4 quarts of 160 ° F hot water result in 10 quarts of active foam in about 2 minutes.
- Special penetrating surfactant helps formula penetrate fiber for optimum cleaning and stain removal.
- Does not cause rapid re-soiling like competitive products – contains anti-re-soiling properties to keep the treated area from attracting residue
- Customer sees a strong solution reaction right before their eyes!

**RTU pH: 7.0**

**Dilution Ratio: 6 oz./gallon of hottest water possible**

**Part # CD19A – 7 lbs.**

**Contractor Price:\$41.55/7 lbs.**

**Contractor Price: \$37.40/ea – 4 x 7 lb. case**
